

Embedded Javascript Plugin (UI)

- Initialize the plugin by referencing the necessary files:

```
<link rel="stylesheet" type="text/css" href="dbsyncwidget.min.css">

<script
src="https://maxcdn.bootstrapcdn.com/bootstrap/3.3.7/js/bootstrap.min
.js"></script>
<script
src="https://av-web.s3.amazonaws.com/ecw/dbsyncwidget.min.js"></scrip
t>
```

- Add div on the page:

```
<div id="dbsyncwidget"></div>
```

- Add javascript initialization in the script tag:
AppName - name of application to connect.
ValidationUrl - API Url to check if application is connected - example: https://<your_server>/ecw/verify/<connector>/<username>.
ConnectUrl - API Url to connector page - example: https://<your_server>/ecw/connect/<process>/<connector>/<username>/<company>.

```
<script>
var dbsyncwidget = null;
var dbsyncButton;

var options = {
  appName: '<Display Label of the Connecting App>',
  validationUrl: 'https://<your_server>/ecw/verify/<connector>/<username>',
  connectUrl:
'https://<your_server>/ecw/connect/<process>/<connector>/<username>/<compa
ny>'
};

$(document).ready(function () {
  dbsyncButton = $('#dbsyncwidget');
  dbsyncwidget = dbsyncButton.dbsyncwidget(options);
});
</script>
```

Configuring Look & Feel (Optional)

1. Add custom css styles:

```
<link href="<your-site-style.css>" rel="stylesheet" />
```

Content of styles.css:

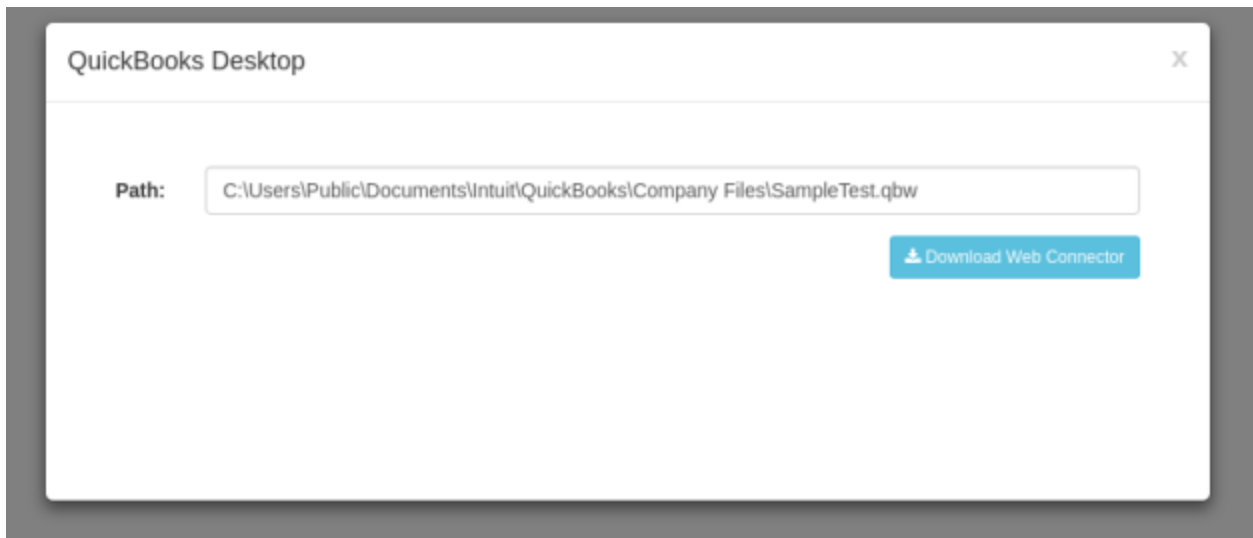

```
.modal-large {  
  width: 60%;  
}  
.dbsync-widget-logo {  
  outline: none;  
  text-decoration: none;  
  border: none;  
  background: url(../images/logo.png) no-repeat 0 0;  
  width: 100px;  
  height: 30px;  
  display: inline-block;  
  margin: 5px;  
}  
.dbsync-widget-logo:hover {  
  filter: brightness(105%);  
}  
  
.dbsync-widget-logo-connected {  
  outline: none;  
  text-decoration: none;  
  border: 2px;  
  background: url(../images/logo-connected.png) no-repeat 0 0;  
  width: 100px;  
  height: 38px;  
  display: inline-block;  
  margin: 5px;  
}  
  
.dbsync-widget-logo-connected:hover {  
  filter: brightness(105%);  
}
```

User Experience

- The user sees a "Connect" button

- On clicking the button, a Modal window opens up to, setup the connection.

- If the connection is successful, the button changes its color and shows "Connected"

- If there is an error, you will see the following message:
