Release 4.2.9

Effective Release Date: **February 28, 2017**
Release Notes:

- Adapter Expired Issue Fixed
- Log View Page Freezing Issue Fixed
- Set As Service Issue Fixed

Adapter Expired Issue Fixed

In this build we have fixed adapter expired issue during sync execution , Now it reloads license if one in sessions suggest expired.

Log View Page Freezing Issue Fixed

In earlier releases we had an issue when sync is in the process, the Log view page getting frozen and hence in this, release we have fixed the issue by setting the log records being retrieved as 50. The log cleaner job purges all the older records apart from the top 50 log records.

Set As Service Issue Fixed

In an earlier release, there was an error while loading up tomcat (set as service was returning an error). In this build set as service, the issue is fixed for windows on-premise version.
