

Release 4.3

Effective Release Date: **March 22, 2017**

Release Notes:

- [Added Support For NetSuite Connector](#)
- [Fixed SkuVault Connector Images](#)

Added Support For NetSuite Connector

In this build, we have added one new connector to our existing connector list i.e. NetSuite connector which will facilitate the data flow in and out of NetSuite application. Also, we have released a standard solution for NetSuite & Salesforce which facilitates the data flow in a bi-directional manner.

Fixed SkuVault Connector Images

In the earlier release, we had an issue for with SkuVault connector image which used to appear in a distorted manner. Now we have updated the new image for the SkuVault connector.
