

AppCenter

The App center is an integrated cloud platform. Its aim is to provide DBSync users with an integrated integration and governance platform so that, independently designed applications and services can work together.

The typical platform offerings aggregates are:

- Cloud services of application server
- Integration development tools
- Composition of wiki
- Support portal and user experience
- Orchestration
- Data management
- Company administration
- User management; and
- Application security, to name a few.

The learning curve to navigate the App center is relatively flat even for a non-tech savvy user. To make user experience as intuitive as possible, we used cutting-edge usability engineering techniques. Please feel free to post your constructive feedback through the portal. The App center comprises of following sections.

1. **Platform Menu** : The platform menu gives users access to manage company information, user information and, template library, to name a few.
2. **Quick Access Menu Bar** : It is tailored to access quick menu of the platform during any phase of the Integration life cycle.
3. **Support Section** : This section provides the user direct links to (1) wiki site; (2) support portal; and (3) community portal, to learn how to share and collaborate from the platform's knowledge base.
4. **Download Section** : The section lets user download the On-Premise version based on Windows or Linux.

Platform Menus

My Home : My home is the landing page of the DBSync App center. It helps the user to Get started with the platform.

Company: Change the existing organizational details.

Users: This module lets a user (1) create new users in the system; (2) change existing user record details; or (3) delete an existing user record.

Template Library: Lets the platform user navigate to existing standard solutions and use them if they have a valid license. If not then, users can try standard solutions to assess the product before purchasing a license .

Quick Access Menu

The Quick Access Menu Bar is customized so that users can quickly access frequently used components of the platform while working on any page of the platform. The below table explains each component and how it can be used within a given context.

Menu Type	Description
Left side Navigation Icon	<p>The left side navigation icon can only be used if the user is familiar with the platform Menu.</p> <p>The Icon reduces the size of the left side navigation considerably. This gives a user some extra space while working on a custom integration project.</p>
Buy Now	<p>Use the 'Buy Now' link to buy additional connectors or solutions. Then, add the product(s) to the shopping cart. Finally, checkout</p> <p>and pay subscription fees with just a click of a button. Read More: License Management</p>
Help & Documentation	<p>Navigate the site to learn about the product features, functionality and its usage.</p>
Contact Us	<p>The 'Contact Us' button will navigate the user to the support portal where s/he can raise a ticket and contact support for additional help.</p>
Logout	<p>Return to the login page.</p>
