

Creating BUNDLE PRODUCTS IN MSCRM

When we want to create multiple hierarchy of products under the single product

Step 1: In mscrm Go to settings->Product catalog->Families and products

(a) Click on Add bundle button and enable the access

Step(2): Go to the products

(a) Click on add new bundle and enter the name of parent bundle product

(b) Go to bundle product under the same parent product and add the other child bundles
