

When LineItems are not linking to Opportunity From Quickbooks Invoice to Salesforce Invoice

Issue:

LineItems are not linking to opportunity in Salesforce From QuickBooks

For Invoice To Opportunity

Solution:

In the rules OpportunityLineItem upsert

Earlier mappings for opportunityID

OpportunityId [reference, 18]

```
SESSION_GET("OPPID-  
"+PARENTVALUE("TxnID"))
```

```
SESSION_GET("OPPID-"+PARENTVALUE("TxnID"))
```

Then instead of using session-id need to do the following changes.

In Salesforce upsert and update rule, the status writer should be selected as Console adapter on success need to mapped as VALUE("newid") on error map can be mapped as "error in creating opportunity"

Sequence	Rule Name	Rule	
1	state_0 47088a 0a54f7- 11e4- 9cfa- a1a415 0a7660	<div><div>Salesforce</div><div>Upsert</div><div>Opportunity</div><div>Using Map</div><div>Less</div></div> <div><div><input checked="" type="checkbox"/> Update Source</div><div>Properties</div></div> <div><div>ConsoleAdapter</div><div>Select Operator</div><div>Select Target Object</div><div>On Success Map On Error Map</div></div>	
2	state_0 421a11 0-64f7- 11e4- 9cfa- d5a1e9 de2a67	<div><div>Salesforce</div><div>Update</div><div>Opportunity</div><div>Using Map</div><div>Less</div></div> <div><div><input checked="" type="checkbox"/> Update Source</div><div>Properties</div></div> <div><div>ConsoleAdapter</div><div>Select Operator</div><div>Select Target Object</div><div>On Success Map On Error Map</div></div>	

Then on OpportunityLineItem upsert rule need to update the mappings for opportunityId as below.

OpportunityId [reference, 18]

```
IF(ISEMPTY(VALUE("newid")),LOOKUP("Sales  
force","select id from Opportunity where  
AVSFQB__Quickbooks_Id__c="+PARENTVAL  
UE("TxnID")+""),VALUE("newid"))
```

```
IF(ISEMPTY(VALUE("newid")),LOOKUP("Salesforce","select id from Opportunity where  
AVSFQB__Quickbooks_Id__c="+PARENTVALUE("TxnID")+""),VALUE("newid"))
```
