

Release 4.6.3

Effective Release Date: Oct 28th, 2019

Release Notes:

Enhancements

- Dedicated QuickBooks Online OAuth2 App for CloudWorkflow
- SQL Server batch size issue
- TradeGecko Connector - Add Support for Invoice

Minor Fixes

- Database Adapter: Column/Table Name with space not working
- Select Target table issue inside a Process in CW
- NetSuite Concurrent connection failure
- Unable to read data from NetSuite
- addsourcetoxml should add xml as the last child
- SQL Server connector host and port field is not storing data
- Scheduler not working with cron expression and when set on time based order is incorrect
- Sync Not working on staging
- Xpath issue while fetching the ancestor node from the child node.
