Upgrade to DBSync 3.1

Upgrading to DBSync 3.1

Download the application

- Go to www.mydbsync.com, click on Customer Login. Enter your DBSync User ID and Password and click on Login button.
- Download The DBSync application from Download link on the right hand side of the My Home page as shown below.
- Download the desired version of DBSync based on the Operating system, either Linux or Windows platform.

Backing-up Your Current Profiles

- Open My Computer and go to << DBSync Install Dir>> \dbsync2\WEB-INF\conf\db and copy all the Files and folders to your Backup drive
- For example, if DBSync is installed in C:\DBSynclS31, you profile path would be "C:\DBSynclS31\dbsync2\WEB-INF\conf\db".
- Copy all the contents in the "db" folder and save it in a desired location.

Uninstalling Previous Version of DBSync

- Go to Start\All Programs\DBSync Integration Suite\Uninstall
- If User Access Control window appears click on Yes.
- Select Yes on DBSyncIS Uninstall window. Once Uninstall is done click on OK.

Upgrading the Application

- Go to the Download folder and start the installation by right-clicking and selecting "Run as Administrator" on the "DBSync_V31.exe" file.
- If the User Access Control window is displayed click on Yes button to authorize the installation.
- Click on Next on the "Welcome to the DBSync Setup Wizard" window.
- · Accept the License Agreement by selecting the option "I accept the agreement" and click on Next.
- The default windows path for DBSync installation is *C:\ DBSynclS31*. If you want to use a different folder, click on the *Browse* button and select a desired location to install DBSync.
- Select the desired Start menu folder name or leave it unchanged to use the default folder and click on Next button. You can un-check the
 option below if you don't wish to create a Start menu folder.
- On the next window, select the check-boxes for Create Desktop Icon and Create a Quick Launch icon if you wish to have DBSync shortcuts on your desktop and click on Next button.
- Click on Install button to proceed with installation. After clicking next you will be presented with installation progress window as shown below.

Once the installation process is done you will be presented with a window with an option to set DBSync as service. If you wish to set it as a service, check the Check box "Set DBSync as Service" and click on *Finish* button as illustrated below.

Once done with Installation, copy the backed-up "db" folder to your new DBSync installation to the folder "C:\DBSyncIS31\db sync2\WEB-INF\conf\db". At this point, you have successfully completed your DBSync Upgrade on your Desktop.

If you have selected the option 'Set DBSync as Service', then DBSync would be running as a Windows Service in the background. If you wish to start dbsync manually, you can start DBSync from your desktop by starting StartVall Programs\DBSync Integration Suite\DBSync.

Verify your Configuration

Go to www.dbsync.com. Click on *Customer Login* from top right corner of the page. Highlighted screenshot is shown below.

- Enter Your User Name and Password and click on Login.
- After logging in, go to My Home and click on Launch button in console area of the page to launch DBSync Console. Your should be re-directed to the DBSync console page.

Setting DBSync as Windows Service after Installation

- 1. Go to Windows Start -- All Programs -- DBSync Integration Suite
- 2. Right Click -- Set as Service
