

Release 4.9.14

Bug

[CW-1515](#): Connectors disappearing frequently

Possibly due to profile.xml corruption. Preventive checks and reversion logic upon corruption of file has been added. We continue to monitor it.

[CW-1349](#): Incorrect date in session runtime props (last_success_run etc).

Issue was possibly due to thread unsafe nature of SimpleDateFormat library. Appropriate code fixes have been applied. We continue to monitor it.

[CW-1371](#): Incorrect Status field in Shopify's Order response

Shopify Adapter's openapi document has been fixed and the status field is removed
