

Release 4.9.26

Bug

[CW-1721](#) Narvar missing fields and array correction: Issue fixed related to, "missing few fields like Carrier in JSON request sent to order unable to sync shipments when there are only one product and the array structure is missing "

[CW-1720](#) FOR CW_4.9.24 version sf connector is not validating: Issue fixed "For a client - we installed new CW version ie. 4.9.24 in their local machine , but in this the sf connection is not getting connected while going to advanced properties and entering username and password manually, instead of using "Connect to Salesforce" button as this method won't work for them... but in this new version, even after entering correct username and password its not validating."

[CW-1676](#) Number format exception when sending over number type fields: Issue fixed: SQL Server to SQL Server integration fails when sending "number" type fields. *Error: java.lang.NumberFormatException: For input string: "0E-7"*

New Feature

[CW-1700](#) Shopify APIs: Worked on below APIs:

(GET)<https://shopify.dev/api/admin-rest/2022-01/resources/customcollection#top> (GET)<https://shopify.dev/api/admin-rest/2022-01/resources/smartcollection#top> (GET)<https://shopify.dev/api/admin-rest/2022-01/resources/checkout#top> (GET)<https://shopify.dev/api/admin-rest/2022-01/resources/collectionlisting#top>

[CW-1620](#) adding missing shopify API's: All the required shopify APIs are added

[CW-1521](#) SF 2 MS Dynamics connector: Worked on prospective client Audimation would like to have a sync established between their SF and MS Dynamics.
