Deleting a Process Definition

How to Delete a Process Definition (PDL) file.

1. Right click on the Profile name under "Navigation" and select "**delete**" on the menu to delete the process definition. A pop up window displays a message for the deletion confirmation of the process definition file. Click on the "**X**" button on the confirmation message if you want to cancel the deletion, or select the "**Cancel**" button. Please see the series of screen shots below for an illustration of this process:

·

2. Click the "**OK**" button and the PDL file will be deleted.
