DBSync Installation and Setup

1. Download the DBSync .Exe file from email which you have received at the time of registration and also the .Exe is available in DBSync home page as shown below.

The screenshot shows the DBSync user interface. At the top left is the DBSync logo. To the right is a 'Buy Now' button and a user profile icon labeled 'User Avankia'. Below the logo is a navigation bar with tabs: 'My Home', 'Company', 'Users', and 'Process Template'. The main content area is titled 'My Account' for 'User Avankia', with a 'Customer Number : 504' and a 'Change Password' link. Below this is a 'Contact Support | Help?' link. A section titled 'DBSync App Engine: Get Your Apps Talking' features a filter bar with categories: 'All', 'Salesforce', 'QuickBooks', 'Microsoft', 'Intacct', 'Oracle', 'Database', and 'Replication'. Below the filter are six demo cards, each with a play button icon and a description: 'Microsoft Dynamics CRM & QuickBooks Integration Demo', 'Salesforce.com & Microsoft Dynamics GP (GreatPlains) Demo', 'Intacct and Databases Integration Demo', 'Intacct Microsoft Dynamics CRM & Intacct Integration Demo', 'Oracle Fusion CRM Integration with Oracle E-Business Suite', and 'Oracle Fusion CRM Integration with Microsoft Dynamics GP (GreatPlains)'. At the bottom left, a red box highlights the text 'Downloads - DBSync ETL 3.2 (On Premise): Windows Linux'. Below this is a 'Get Started Tutorials' link.

2. Follow the steps for installation which are self explanatory in nature.

If you have selected the option 'Set DBSync as Service' during installation, then DBSync would be running as a Windows Service in the background. If you have not opted to select this, then you can start DBSync from your Start Up > Program Files > DBSync Integration Suite.

DBSync Configuration

1. Login into dbsync by following the <https://dbsync05.appmashups.com/appcenter/login> in your internet browser. You can provide the username and password which has been emailed during registration with us.

DBSync as Windows Service

1. Go to Windows Startup
2. Click on "DBSync Integration Suite"
3. Click on "Set as Service"

Alternatively you can follow the following article to configure installed Tomcat as a Windows service
