Release 4.2.5

Effective Release Date: **January 10, 2017**

Release Notes:

- FAST_TLOOKUP Added To Standard Functions
- Minor Fixes

FAST_TLOOKUP Added To Standard Functions

In this release we have added a new function to the list of existing standard function i.e. FAST_TLOOKUP . The Syntax for the function is as follows .

Syntax :

FAST_TLOOKUP("SELECT field1 FROM table1 WHERE field2 = (fName)

The FAST_TLOOKUP is also backward compatible with TLOOKUP function which means you can use the function FAST_TLOOKUP like shown in below

FAST_TLOOKUP("SELECT field1 FROM table1 WHERE field2 = ''' + VALUE("fName") + """)

Minor Fixes

- MSCRM RMI Bug fix.
