

Release 4.3.1

Effective Release Date: **April 20, 2017**

Release Notes:

- [File connector XML support](#)
- [Email notification fix](#)
- [QuickBooks Online batch processing fix](#)

File connector XML support

In this build, we have enhanced the File connector so that it can write data in the the XML format.

Email notification fix

In earlier release when ever the processes fail, the email notification were not sent to the specified recipients due to internal system error. This fix is done and from now on, the receipients will get the log via email notification when ever there is process run failure.

QuickBooks Online batch processing fix

QuickBooks Online batch processes initiated from Salesforce now supports POST method and accepts secured token instead of plain username and password.
