Upgrade to DBSync 2.8

Upgrading to DBSync 2.8

Download the application

- Go to www.mydbsync.com, Click on ***Customer Login.*** Enter your ***User ID*** and ***Password*** and click on ***Login*** button.
- Download The DBSync application from ***Download*** link on the right hand side of the ***My Home*** page.

Backup your current profiles

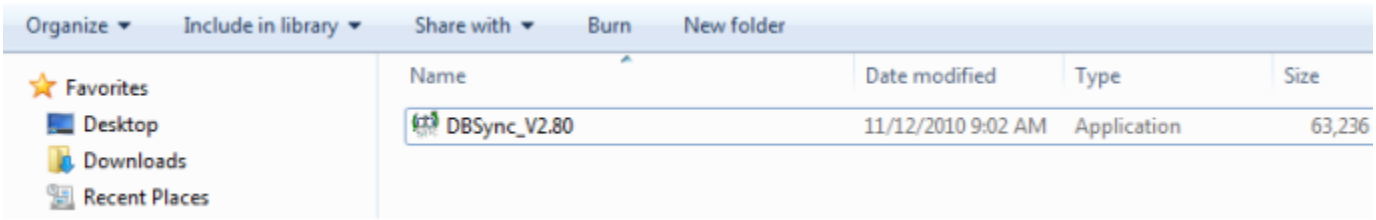
- Open My Computer and go to ***"C:\DBSyncIS\dbsync2\WEB-INF\conf\db"*** and copy all the Files and folders to your ***Backup drive.*** The path listed earlier is default installation path, If you have installed ***DBSync*** in some other drive, go to mentioned drive and browse to ***DBSyncIS\dbsync2\WEB-INF\conf\db*** and copy all the Files and folders to your ***Backup drive***.

Uninstalling Previous Version of DBSync

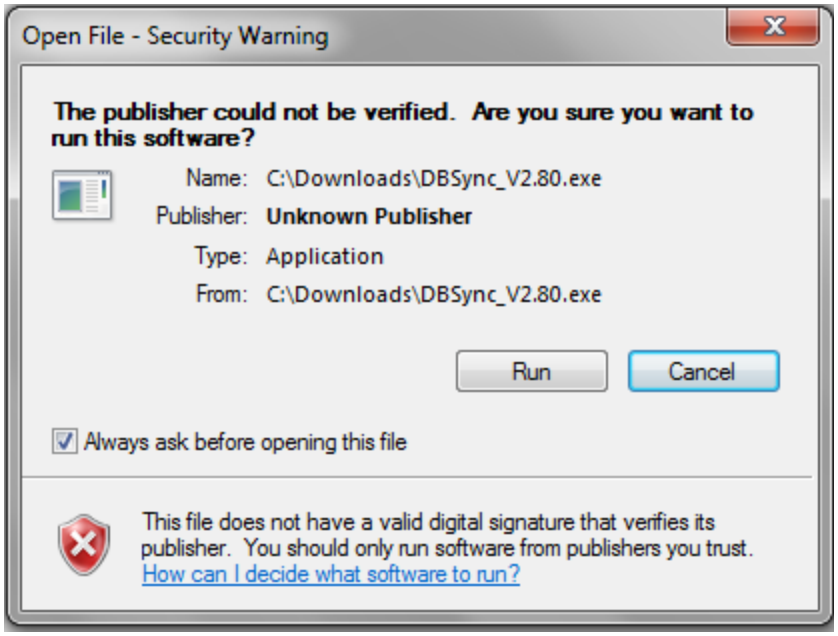
- Go to ***Start\All Programs\DBSync Integration Suite\Uninstall***
- If User Access Control window appears click on Yes.
- Select ***Yes*** on ***DBSyncIS Uninstall*** window. Once Uninstall is done click on ***OK***.

Upgrading the application

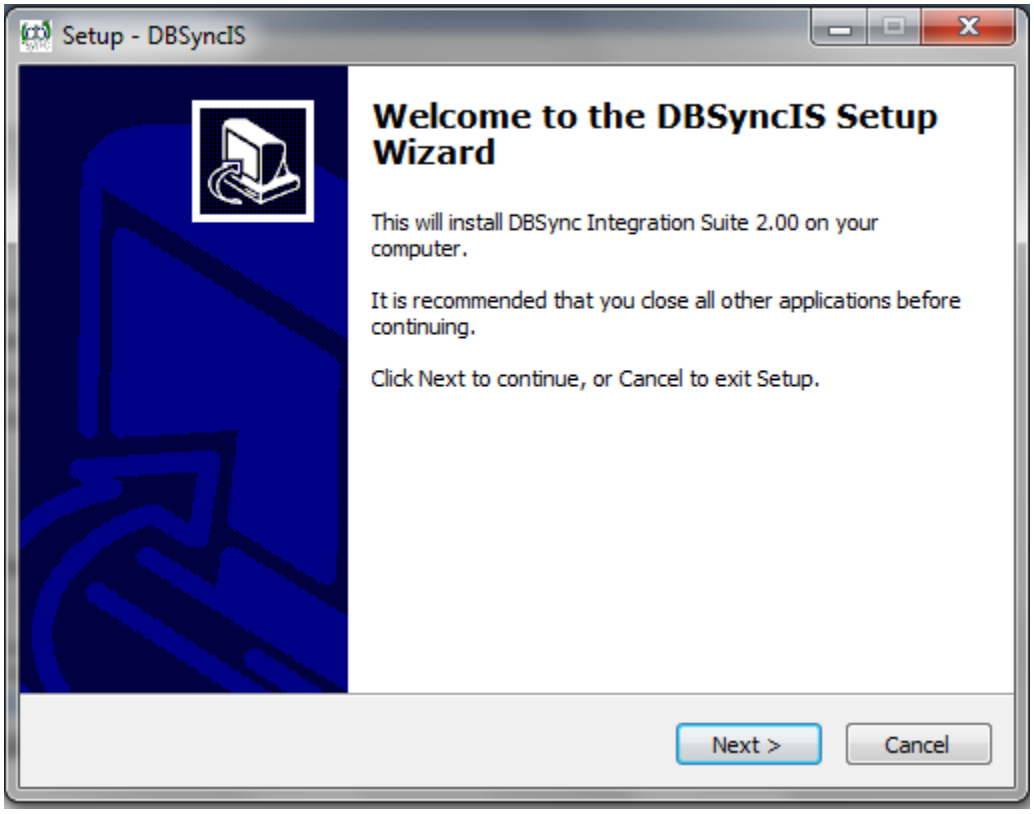
- Go to the Download folder and start the installation by Double Clicking the "DBSync_V2.80" file.



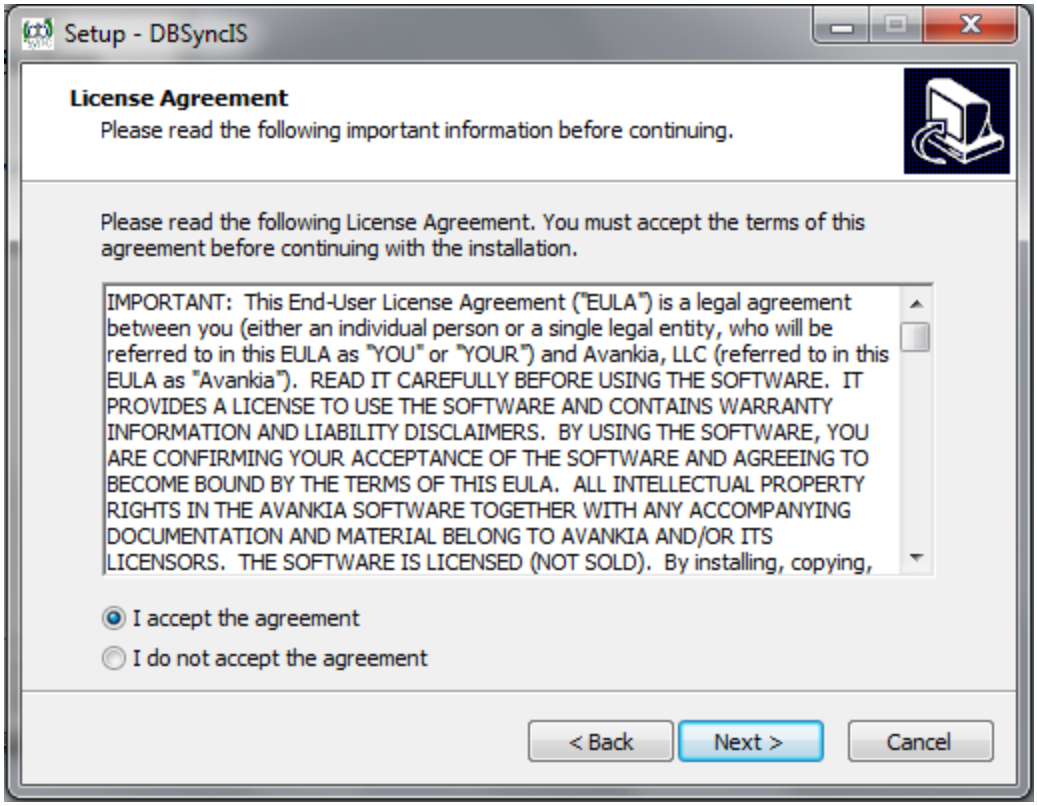
- Click on the ***Run*** button once the Open File Dialog appears. The dialog is shown below:



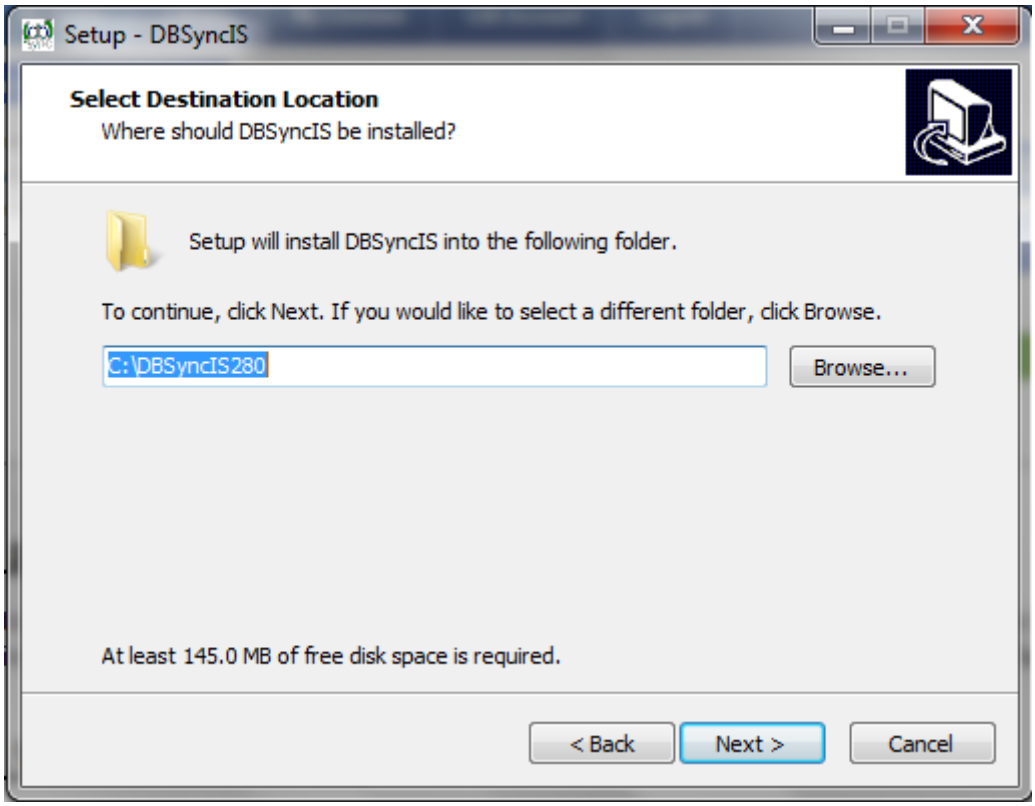
- If the User Access Control window is displayed click on ***Yes*** button to authorize the installation.
- Click ***Next*** on the "Welcome to the DBSync Setup Wizard".



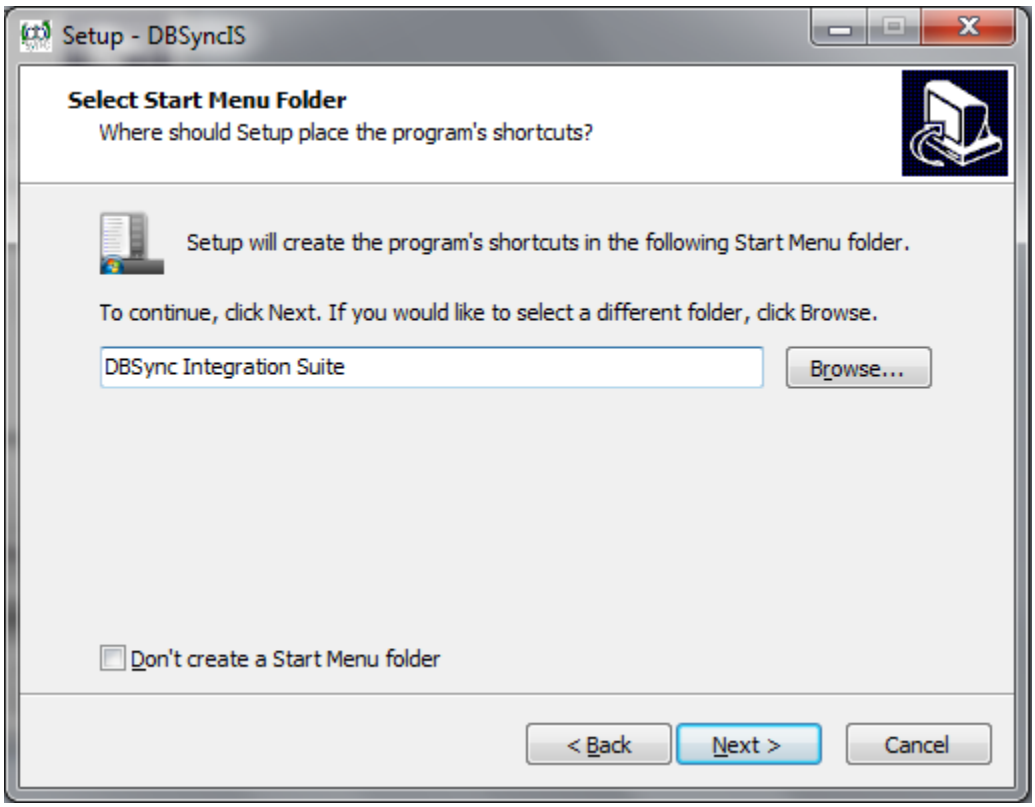
- Accept the License Agreement By selecting the option button "***I accept the agreement***" and click on ***Next***.



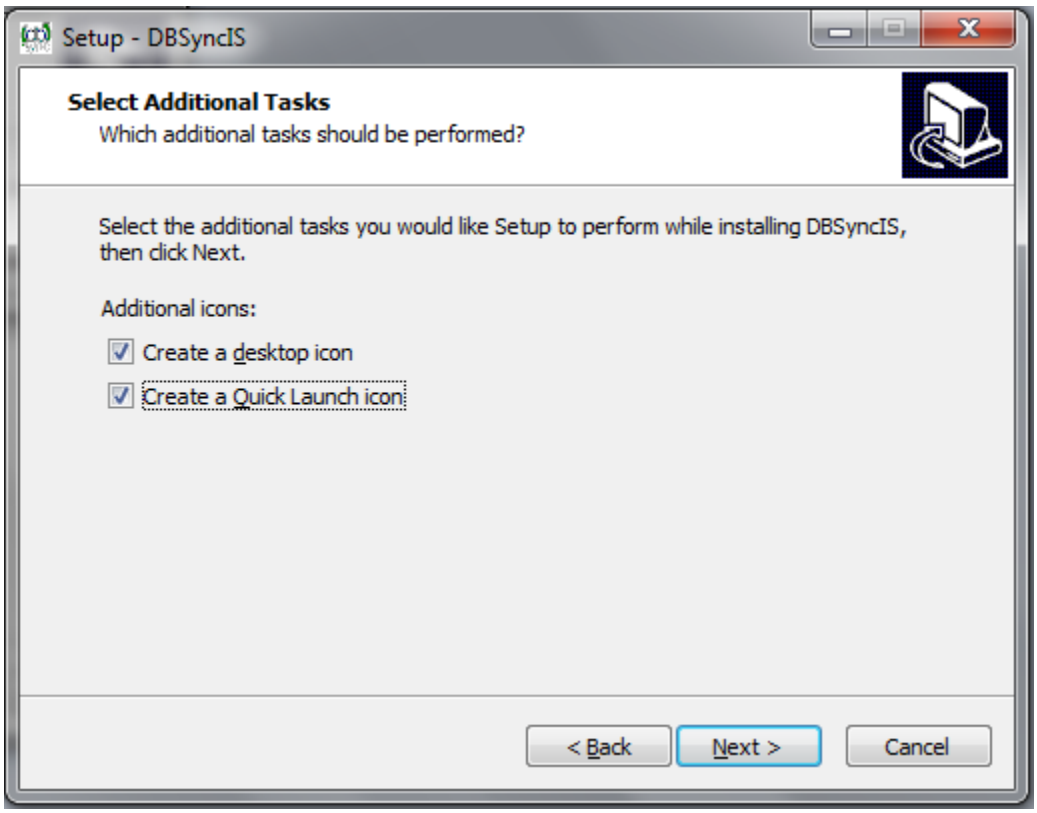
- On Select Destination Location default is ***C:\DBSyncIS280*** if you want you can select any other folder by clicking browse and click on ***Next***.



- On the Next Screen Click on ***Next*** Button.

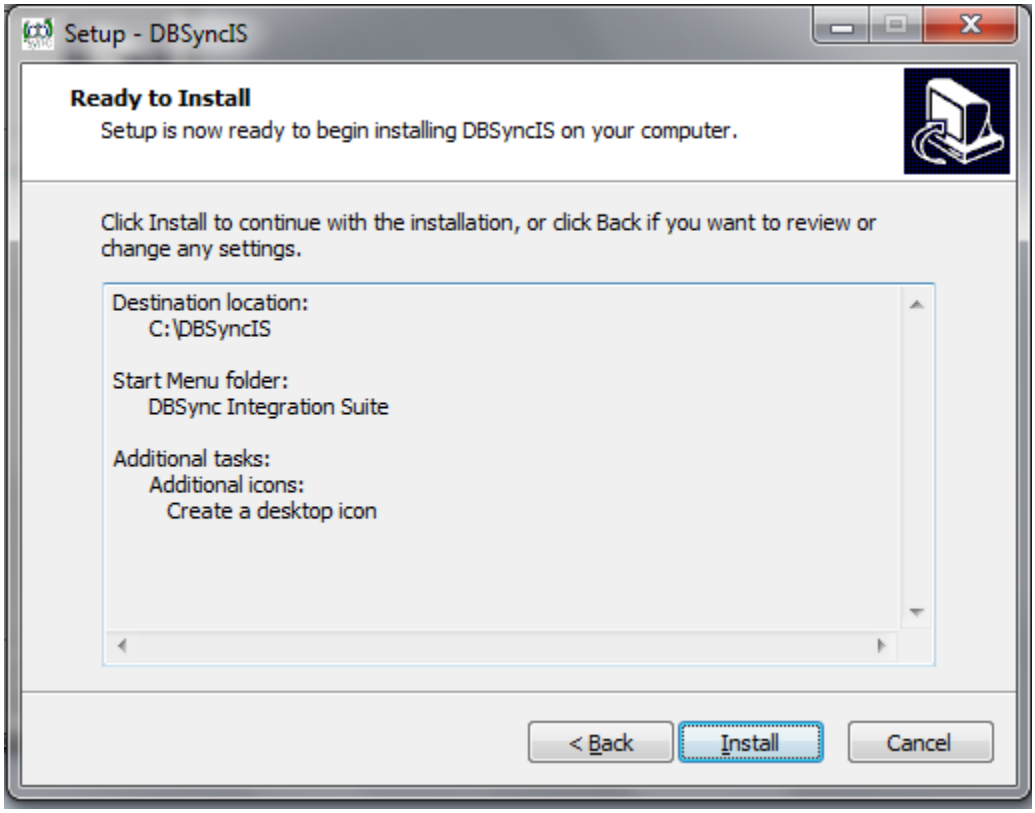


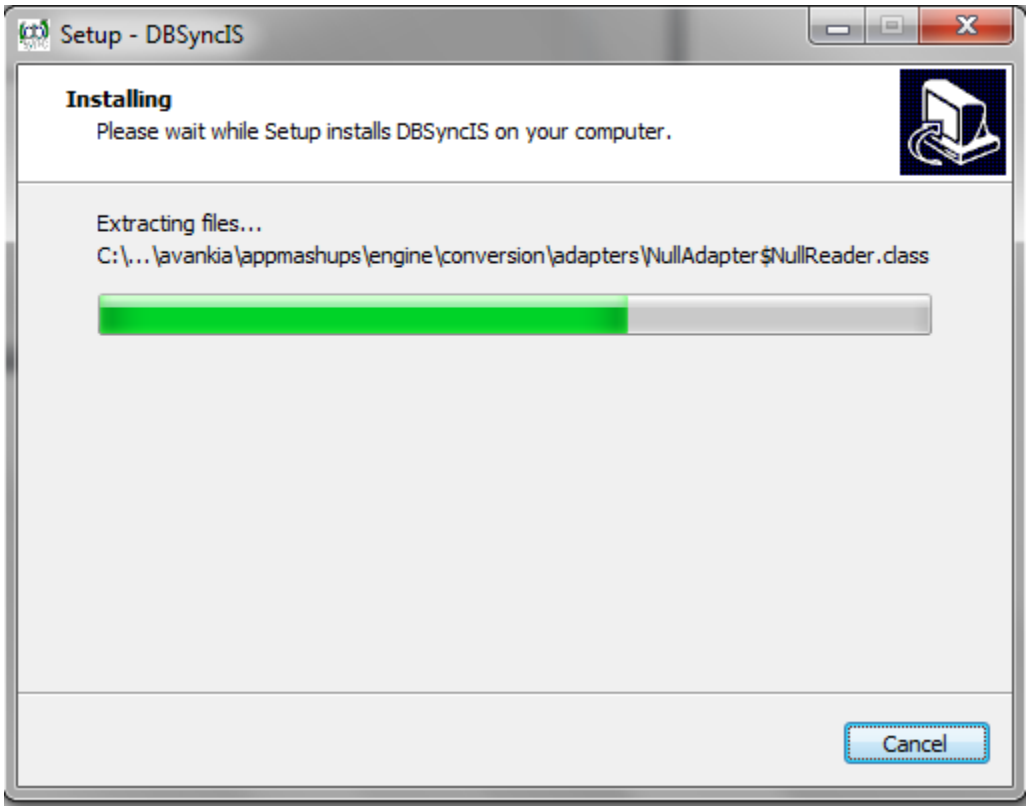
- On the Next Screen select the check-boxes for ***Create Desktop Icon*** and ***Create a Quick Launch icon*** and click on ***Next*** button.



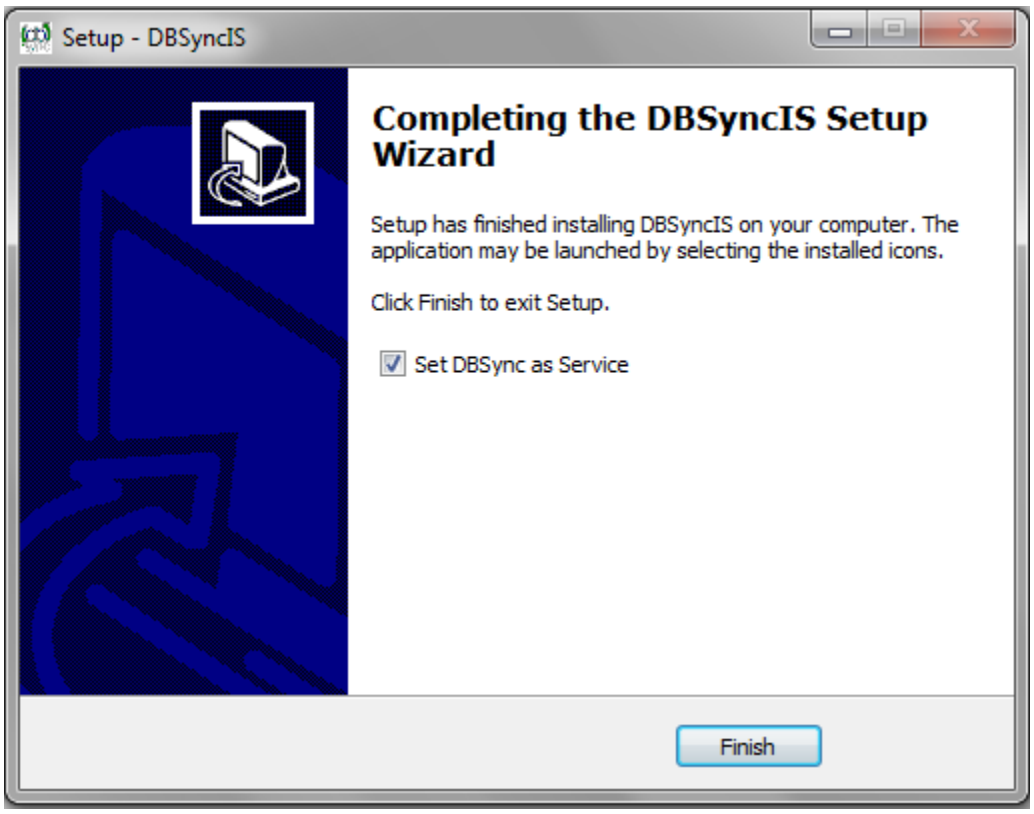
- Click on ***Install*** button to go ahead with installation. After clicking next you will be presented with installation progress window. Both the

windows are shown below respectively:





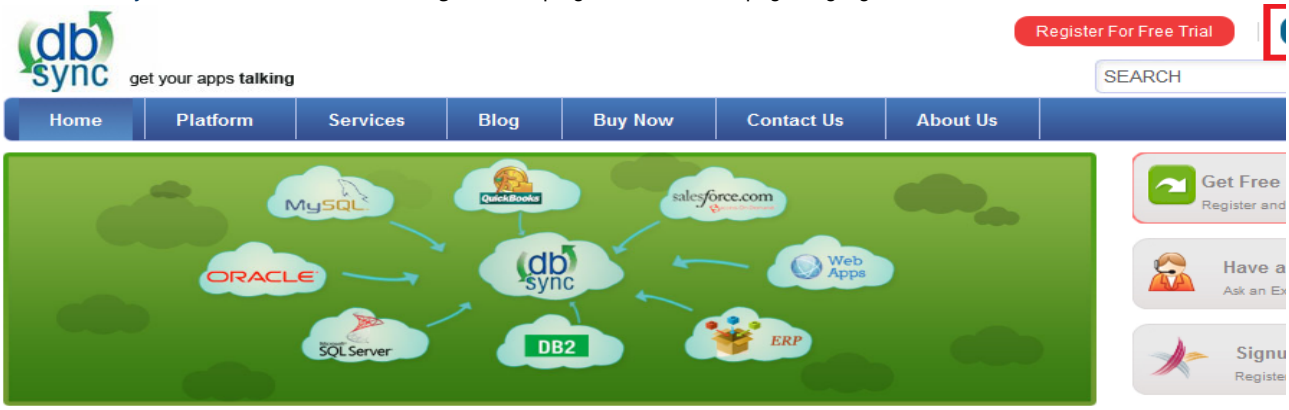
- Once the installation process is done you will be presented with a window with an option to set DBSync as service. If you wish to set it as a service, check the Check box "Set DBSync as Service" and click on ***Finish*** button.



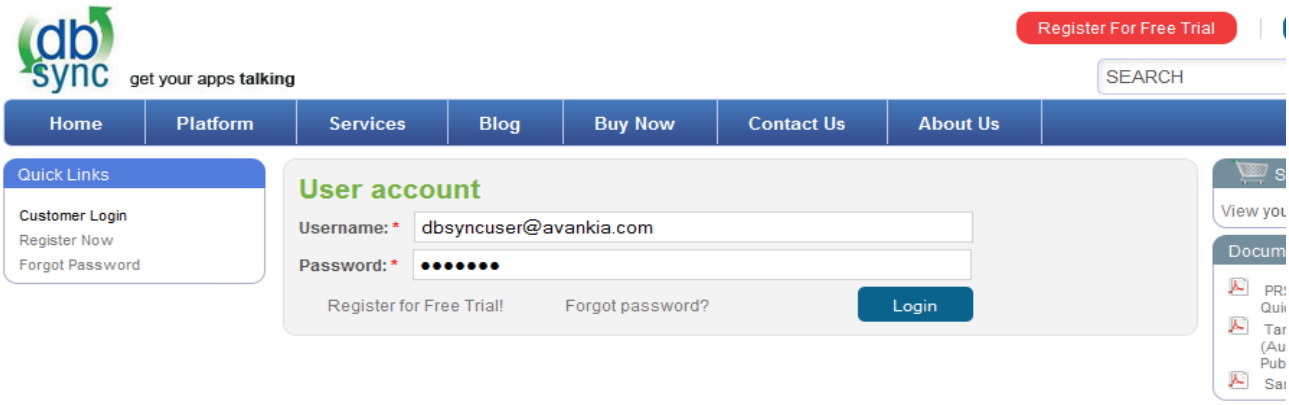
- Once done with Installation, copy all the backup files and folders to ***"C:\DBSyncIS2.8\dbsync2\WEB-INF\conf\db"*** folder. At this point, you have successfully completed your DBSync Upgrade on your Desktop. If you have selected the option 'Set DBSync as Service', then DBSync would be running as a Windows Service in the background. If you have not opted to select this, then you can start DBSync from your desktop by starting ***Start\All Programs\DBSync Integration Suite\DBSync.***

DBSync Configuration

- Go to www.dbsync.com. Click on ***Customer Login*** from top right corner of the ?page. Highlighted screenshot is shown below.



- Enter Your ***User Name*** and ***Password*** and click on ***Login***.



- After Log In go to ***My Home*** and click on ***Launch*** button in console area of the page to launch ***DBSync Console***. The highlighted screenshot is shown below.

DBSync as Windows Service

1. Go to Windows ***Start***
2. Click on ***All Programs***
3. Click on ***DBSync Integration Suite***
4. Click on ***Set as Service***
