

# Salesforce Opportunity to QuickBooks - Disabling Jobs

- [Salesforce & QuickBooks BiDirectional Template](#)
- [Salesforce & QuickBooks Online Template](#)

## Salesforce & QuickBooks BiDirectional Template

- Go to [www.mydbsync.com](http://www.mydbsync.com). Click on **Customer Login**. Enter your **Username** and **Password**. Then, click on **Sign in**. Click on **Launch** to access Development Studio.
- **Validate** your connection settings for Salesforce and QuickBooks.
- Go to workflow **Opportunity to invoice**. In the Rules section, open the map for Sequence No.2. Then, replace the mapping of VALIDATE ROW from "**true**" to "**false**".
- After making the above changes, DBSync will not create jobs in your QuickBooks.
- The above procedure can be replicated for other mappings - like OpportunityToSalesOrder, OpportunityToSalesReceipt, OpportunityToEstimate and OpportunityToCreditMemo.
- Open mapping for **sequence/rule no. 6** and make the following changes to the source and target mappings.
- Find the target field "**InvoiceAddRq/InvoiceAdd/CustomerRef/FullName**" and replace the source code by copy and paste the following: `LEFT(VALUE("Account/Name"),41)`
- Open Mapping for **sequence/rule no. 8** and make the following changes to the source and target mappings.
- Find the target field "**InvoiceModRq/InvoiceMod/CustomerRef/FullName**" and replace the source code by copy and paste the following: `LEFT(VALUE("Account/Name"),41)`

## Salesforce & QuickBooks Online Template

- Go to [www.mydbsync.com](http://www.mydbsync.com). Click on **Customer Login**. Enter your **Username** and **Password**. Click on **Sign in**. Click on **Launch** to access the Development Studio.
- **Validate** your connection settings for Salesforce and QuickBooks Online.
- Go to process **SFQB\_OpportunityToInvoice**. Open the workflow OpportunityToInvoice. Then, open the map for **Sequence No.2** and replace the mapping of VALIDATE ROW from "**true**" to "**false**".
- Open mapping for **Sequence No 4** and make the following changes to Source and Target Mappings.
- Find the target field "**CustomerRef**" and replace the source code by copy and paste the following:

```
IF( ISEMPY( (String)SESSION_GET( "CreateJobFlag" ) ) , LEFT( VALUE( "Account/Name" ) , 41 ) ,  
LEFT( VALUE( "Account/Name" ) , 41 ) + " : " + LEFT( VALUE( "Name" ) , 41 ) )
```

- This completes disabling Jobs for your Salesforce and QuickBooks Online solution template.
