

There was an ERROR when Converting Amount in the Field Amount

Issue: Amount value from Salesforce is not getting pushed to QuickBooks because of decimal places exceeding more than two values.

Reason: QuickBooks does not support amount values more than two decimal places. Thus Invoices can not be created through Sync due to amount value exceeding two decimal places.

Save Result: 1 of 1 :false--Message: There was an error when converting the amount "156.2587" in the field "Amount".

Fig 2: Logs

Solution:

1. Open the Workflow that needs to be updated.
2. Update the Amount field by `LSPLIT(VALUE("UnitPriceCustom__c"),".")+". "+RIGHT(RSPLIT(VALUE("TotalPrice"),"."),2)`.
3. Save and close the Workflow.
