

testconnection

Tests a connection to Source and Database

Usage

```
admin(.bat or .sh) testconnection <<profilename>> <<type>>
```

profilename: Name of the profile that you wish to test

type: "source" or "database" (Source can be - "salesforce" or "mscrm")

Example

Validate Salesforce and Microsoft CRM connection on source setup tab in "myprofile" and click on Test connection to connect.

```
Linux
./admin.sh testconnection myprofile salesforce
./admin.sh testconnection myprofile mscrm
```

```
Windows
admin.bat testconnection myprofile salesforce
admin.bat testconnection myprofile mscrm
```

Tests the connection to a Database as setup in "myprofile"

```
Linux
./admin.sh testconnection myprofile database

Windows
admin.bat testconnection myprofile database
```
