

Release 6.3

Effective Release Date: **July 02nd, 2019**

Release Notes:

- [Enhancements](#)
- [Minor Fixes](#)

Enhancements

1. Security Permissions and Role management (**User Interface for Policy**)
 - **Administrator (admin@localhost)** can now create custom roles with fine-grained permissions enabled or disabled on specific modules within the application. And these roles can be assigned to new or existing users.
 - It comes two pre-defined roles (**apart from an administrator**) named "**DEVELOPER**" and "**READ_ONLY**" with all edit and read-only permissions respectively.

Minor Fixes

- No minor fixes for this release.
