Release 6.5.2

Effective Release Date: Nov 7th, 2019
Release Notes:

Enhancements

- Cloud Version: Custom Policies not working properly (Role and User Management).

Minor Fixes

- When we run the process from export, logs page total count shows zero.
- Check status API, a status attribute not reporting a failed status issue. It will show all the three status like "In Progress", "Completed" and "Failed".
- Email on error issue while running in WEB API mode. (It will send an email if the process has been failed).
