Sorting of OpportunityLineItems from Salesforce opportunities to Quickbooks Transactions

Issue:

The order of the products under the opportunity wouldn't be synced in the same order to invoice unless the changes are made in the advanced query builder of the DBSync.

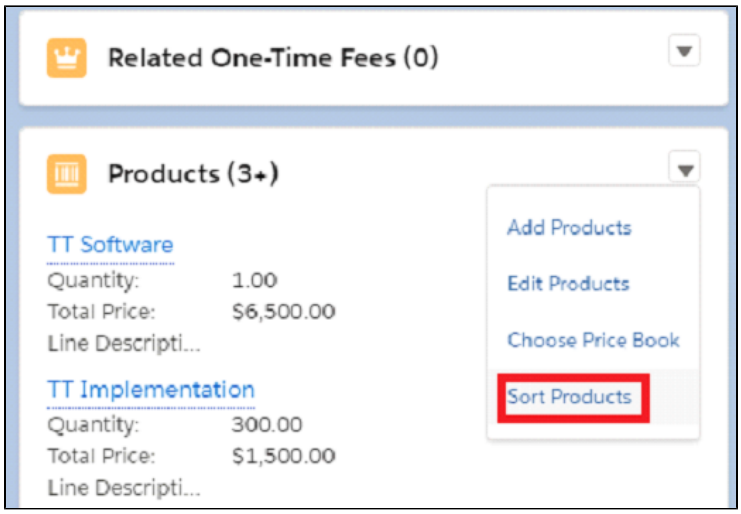
The Query for unsorted order:

Query
`SELECT {!.},Account.Id,(SELECT {!OpportunityLineItems/records} FROM OpportunityLineItems) FROM Opportunity where Opportunity.AVSFQB__Generate_Object__c= 'Invoice' and AVSFQB__Products_Count__c > 0`

Solution:

Step 1:

- Navigate to products under opportunity.
- Click on the dropdown present on the rightmost top corner.



- Select the Sort Products button.
- Drag the products into the order you want and save.

Step 2:

Make the necessary changes mentioned below in the Advanced query builder section

for the respective project after logging into your DBSync account.

The Query for sorted order:

Query:

```
SELECT {!.},Account.Id,(SELECT {!OpportunityLineItems/records} FROM
OpportunityLineItems Order By SortOrder) FROM Opportunity where
Opportunity.AVSFQB__Generate_Object__c= 'Invoice' and
AVSFQB__Products_Count__c > 0
```
