

INVALID_SESSION_ID Error (Session time out error from the Salesforce)

INVALID_SESSION_ID Error (Session time out error from the Salesforce)

Issue :

INVALID_SESSION_ID in the cloud replication while sync is running, This error occurs when the Salesforce session established by the DBSync cloud replication has expired.

Error in the tomcat:

INVALID_SESSION_ID: Invalid Session ID found in SessionHeader: Illegal Session. Session not found, missing session key:00DN00000001xpUIARkAQHV.1RXn.Nr34RSaEyGaq.yzqctjLmw.lpDKqzwFrV115eE5bd85y4KfeSJzf.t6Z.2U3nNmbeduA71dEeg.607Tqk2Mn

Solution:

To resolve the issue, increase the Salesforce session timeout value at [Salesforce.com](https://www.salesforce.com).

Do the following:

1. Login to Salesforce.
2. Go to Setup > Security Controls > Session Settings.
3. Increase the timeout value from 30 minute to 2 hours.(accordingly)
