

# Release 4.9.16

## Bug

[CW-1252](#) : Setup Wizard Client View Fields/Values not showing for Related Table Variable

The appropriate fix has been applied. The related table fields are now displayed under setup wizard Client view form.

[CW-1305](#) Detail logs are not loading on UI level for DLL group(App08)

Appropriate fix has been applied to ignore the invalid xml characters while displaying the logs.

[CW-1558](#) The FTP Schedulers are not triggering accordingly and the error message is not clear

Additional logs are added for FTP connector and conversion processor to show more information in logs display to further troubleshooting.
