

DBSync On Demand to On Premise

1. When you register for DBSync by default, you get On Demand version of DBSync. If you want change from On Demand to On Premise, then, make a small change in the DBSync account by following the steps below:
2. When you change from On Demand to On Premise, all the PDLs of your profile, in your On Demand version, will not be available in On Premise version.
3. Login to DBSync Profile using registered Username and Password. Click on **Company** to see all the Usernames under that company. Click **Edit** under DBSync Org Properties. Then, click **Edit** again and enter **URL** as "<http://localhost:8080/dbsync2/login.m>".
4. In order to use On Premise version of DBSync, it is necessary that DBSync is installed locally. Click on the link, <http://help.mydbsync.com/docs/display/dbsync/DBSync+On-Premise+Installation>, to learn about the process of installation.
5. If you want to switch back to **On-Demand** Version of DBSync, login to DBSync profile using registered Username and Password. Click on **Company** to see all the Usernames. Click **Edit** under DBSync Org Properties. Then, click **Edit** again and confirm that **URL** is "<https://dbsync05.appmashups.com/appcenter/login>". When you change from On Premise to On Demand, all the PDLs for your profile in your On Premise version will not be available in On Demand version.
