

# Importing Process Definitions

## How to Import a PDL file

The administrator or user also has the option of importing process definitions from other sources. In order to accomplish this task, please follow the steps below:

1. From the DBSync 2.0 profiles page, click on the **Edit** button next to an existing adapter name that is on your profiles list.
2. Click the **Upload** button on the lower left hand corner (as illustrated in the screen shot below) to upload the file
  -
3. Click **Browse** (as illustrated in the screen shot below) to choose the file from the folder.
  -
4. After finding the appropriate PDL (process definition language) file, click **Upload** to upload the file as illustrated in the screen shot below:
